About This Report

Scope & Method

This report forecasts US refrigerated yogurt retail sales in pounds and nominal US dollars to 2022. Total retail sales are segmented by product in terms of:

- spoonable
- drinkable

Total shipments of nonfrozen yogurt in nominal US dollars at the manufacturer level are also forecast to 2022.

To illustrate historical trends, total retail sales, total shipments, and the various segments are provided in annual series from 2007 to 2017.

Shelf-stable and frozen yogurt products are excluded from shipment and retail sales figures. Shipments include product for sale to retail stores, as well as to all other markets, such as food processors and restaurants.

This report quantifies trends in various measures of growth and volatility. Growth (or decline) expressed as an average annual growth rate (AAGR) is the least squares growth rate, which takes into account all available datapoints over a period. The volatility of datapoints around a least squares growth trend over time is expressed via the coefficient of determination, or r^2 . The most stable data series relative to the trend carries an r^2 value of 1.0; the most volatile – 0.0. Growth calculated as a compound annual growth rate (CAGR) employs, by definition, only the first and last datapoints over a period. The CAGR is used to describe forecast growth, defined as the expected trend beginning in the base year and ending in the forecast year. Readers are encouraged to consider historical volatility when assessing particular annual values along the forecast trend, including in the forecast year.

Key macroeconomic indicators are also provided with quantified trends. Other various topics, including profiles of pertinent leading suppliers, are covered in this report. A full outline of report items by page is available in the Table of Contents.

Sources

Yogurt: United States (FF10052) represents the synthesis and analysis of data from various primary, secondary, macroeconomic, and demographic sources including:

- firms participating in the industry, and their suppliers and customers
- government/public agencies
- national, regional, and international non-governmental organizations
- trade associations and their publications

About This Report

- the business and trade press
- indicator forecasts by The Freedonia Group
- the findings of other reports and studies by The Freedonia Group
