About This Report

Scope

This report forecasts to 2021 the US college course material market in nominal US dollars. Total sales are segmented by product in terms of:

- new course materials – digital media (including etextbooks) and new textbooks (print)
- used textbooks

To illustrate historical trends, total sales and the various segments are provided for 2017 and 2018.

Other data provided in this report include:

- US projected undergraduate enrollment by institution type for 2017 and 2022
- US online undergraduate enrollment in higher education for fall 2017
- leading college publishers by revenue for 2017 and 2018

Freedonia quantifies trends in various measures of growth and volatility. Growth (or decline) expressed as an average annual growth rate (AAGR) is the least squares growth rate, which takes into account all available datapoints over a period. The volatility of datapoints around a least squares growth trend over time is expressed via the coefficient of determination, or r^2 . The most stable data series relative to the trend carries an r^2 value of 1.0; the most volatile – 0.0. Growth calculated as a compound annual growth rate (CAGR) employs, by definition, only the first and last datapoints over a period. The CAGR is used to describe forecast growth, defined as the expected trend beginning in the base year and ending in the forecast year. Readers are encouraged to consider historical volatility when assessing particular annual values along the forecast trend, including in the forecast year.

A full outline of report items by page is available in the Table of Contents.

Sources

College Course Materials: United States (FF25021) is based on [College Course Materials Trends and Outlook 2019-2021](#), a comprehensive industry study published by Simba Information. In sizing the market segments for that report, Simba Information follows the procedure it established in 2015 for how it breaks down market segments. Simba Information used the market size for new course materials as provided by sales figures from the Association of American Publishers. Simba Information further broke down that segment into new print textbooks and digital materials. Those breakdowns are Simba

About This Report

Information's own estimates based on its ongoing research in the area of instructional materials in higher education.

Simba Information's segment projections are its own and are reached based on several factors, including enrollment patterns, trends in student preferences for study materials and buying habits, and new-edition (or front list) publishing cycles. Additionally, Simba Information tapped other third-party resources.

Specific sources and additional resources are listed in the Resources section of this publication for reference and to facilitate further research.
