ABOUT THIS REPORT

Scope & Method

This report forecasts US wood fencing demand in US dollars at the manufacturers' level and linear feet to 2018. Total demand in US dollars is segmented by product in terms of:

- privacy
- picket
- post and rail
- split rail and other fencing such as lattice fencing and worm fencing.

Excluded from the scope of this report are retaining walls, guardrails, and highway sound barriers, although these products may serve some function similar to fences.

Total demand in US dollars is also segmented by market as follows:

- residential building
- nonresidential building
- agricultural
- nonbuilding.

To illustrate historical trends, total demand in US dollars is reported at five-year intervals for 2003, 2008, and 2013; total demand in linear feet and the various segments in US dollars are provided for 2008 and 2013. Forecasts are developed via the identification and analysis of pertinent statistical relationships and other historical trends/events as well as their expected progression/impact over the forecast period. Changes in quantities between reported years of a given total or segment are typically provided in terms of five-year compound annual growth rates (CAGRs). For the sake of brevity, forecasts are generally stated in smoothed CAGR-based descriptions to the forecast year, such as “demand is projected to rise 3.2% annually through 2018.” The result of any particular year over that period, however, may exhibit volatility and depart from a smoothed, long-term trend, as historical data typically illustrate.

Key macroeconomic indicators are also provided at five-year intervals with CAGRs for the years corresponding to other reported figures. Other various topics, including profiles of pertinent leading suppliers, are covered in this report. A full outline of report items by page is available in the [Table of Contents](#).

Sources

Wood Fencing: United States is based on [Fencing](#), a comprehensive industry study published by The Freedonia Group in November 2014. Reported findings represent the synthesis and analysis of data from various primary, secondary, macroeconomic, and

demographic sources including:

- firms participating in the industry, and their suppliers and customers
- government/public agencies
- national, regional, and international non-governmental organizations
- trade associations and their publications
- the business and trade press
- The Freedonia Group Consensus Forecasts dated August 2014
- the findings of other industry studies by The Freedonia Group.

Specific sources and additional resources are listed in the [Resources](#) section of this publication for reference and to facilitate further research.

Industry Codes

The topic of this report is related to the following industry codes:

NAICS/SCIAN 2007		SIC	
North American Industry Classification System		Standard Industry Codes	
321999	All Other Miscellaneous Wood Product Manufacturing	2499	Wood Products, NEC
