About This Report

Scope & Method

This report forecasts US elder care services revenues in nominal US dollars to 2021. Total revenues is segmented by service in terms of:

- skilled nursing
- home healthcare
- social services
- continuing care retirement communities
- assisted living

Excluded from the study are services provided by caregivers who are directly employed by the patient or family and care that is provided by the family members themselves.

Total revenues is also segmented by payment source as follows:

- Medicaid
- out-of-pocket
- Medicare
- private insurance
- other sources such as US Department of Veterans Affairs, private grants, and charitable donations

To illustrate historical trends, total revenues are provided in annual series from 2006 to 2016; the various segments are reported at five-year intervals for 2006, 2011, and 2016.

This report quantifies trends in various measures of growth and volatility. Growth (or decline) expressed as an average annual growth rate (AAGR) is the least squares growth rate, which takes into account all available datapoints over a period. The volatility of datapoints around a least squares growth trend over time is expressed via the coefficient of determination, or r^2 . The most stable data series relative to the trend carries an r^2 value of 1.0; the most volatile – 0.0. Growth calculated as a compound annual growth rate (CAGR) employs, by definition, only the first and last datapoints over a period. The CAGR is used to describe forecast growth, defined as the expected trend beginning in the base year and ending in the forecast year. Readers are encouraged to consider historical volatility when assessing particular annual values along the forecast trend, including in the forecast year.

About This Report

Key macroeconomic indicators are also provided with quantified trends. Other various topics, including profiles of pertinent leading suppliers, are covered in this report. A full outline of report items by page is available in the Table of Contents.

Sources

Elder Care Services: United States (FF95022) is based on [Elder Care Services in the US](#), a comprehensive industry study published by The Freedonia Group. Reported findings represent the synthesis and analysis of data from various primary, secondary, macroeconomic, and demographic sources including:
