ABOUT THIS REPORT

Scope & Method

This report forecasts total world demand in 2020 for salt by market and major world region in metric tons. Market segments include:

- chemical manufacturing
- road deicing
- food processing
- livestock
- other markets such as water treatment, pharmaceutical manufacturing, and oil and gas drilling.

This report analyzes the global market for salt (ie, sodium chloride), including crystallized (ie, dry) salt and salt contained in a brine solution. For salt in a solution, only the weight of the salt content is considered. This report covers both captive salt produced for use within a company's operations (such as chemical manufacturing) and salt sold on the open market.

Major world regions include:

- North America
- Western Europe
- Asia/Pacific
- all other regions.

Demand by market segment is also forecast for each major world region.

To illustrate historical trends world, market, and regional demand (including market segments) are provided for 2010 and 2015.

Finally, world production is segmented by major world region and provided for 2010, 2015, and 2020.

This report quantifies trends in terms of compound annual growth rates (CAGRs), which, by definition, employ in their calculation only the first and last datapoints over a period. The CAGR is used to describe forecast growth, defined as the trend beginning in the base year and ending in the forecast year. Forecasts are developed via the identification and analysis of pertinent statistical relationships and other historical trends and events, as well as their expected impact over the forecast period. Readers are encouraged to consider historical volatility when assessing particular annual values along the forecast trend, including in the forecast year.

Other various topics, including profiles of pertinent leading suppliers, are covered in this report. A full outline of report items by page is available in the [Table of Contents](#).

Sources

World Salt (FW65022) is based on [a comprehensive industry study](#) published by The Freedonia Group in July 2016. Reported findings represent the synthesis and analysis of data from various primary, secondary, macroeconomic, and demographic sources including:

- firms participating in the industry, and their suppliers and customers
- government/public agencies
- national, regional, and international non-governmental organizations
- trade associations and their publications
- the business and trade press
- indicator forecasts by The Freedonia Group
- the findings of other industry studies by The Freedonia Group.

Specific sources and additional resources are listed in the [Resources](#) section of this publication for reference and to facilitate further research.

Industry Codes

The topic of this report is related to the following industry codes:

NAICS/SCIAN 2007		SIC	
North American Industry Classification System		Standard Industry Codes	
212393	Other Chemical and Fertilizer Mineral Mining	1479	Chemical and Fertilizer Mineral Mining, NEC
311942	Spice and Extract Manufacturing	2819	Industrial Inorganic Chemicals, NEC
325998	All Other Miscellaneous Chemical Product and Preparation Manufacturing	2899	Chemicals and Chemical Preparations, NEC
