INDUSTRY STRUCTURE

Cht World Label Stock Market Share, 2006 262
 1 Selected Acquisitions & Divestitures 268
 2 Selected Cooperative Agreements 272

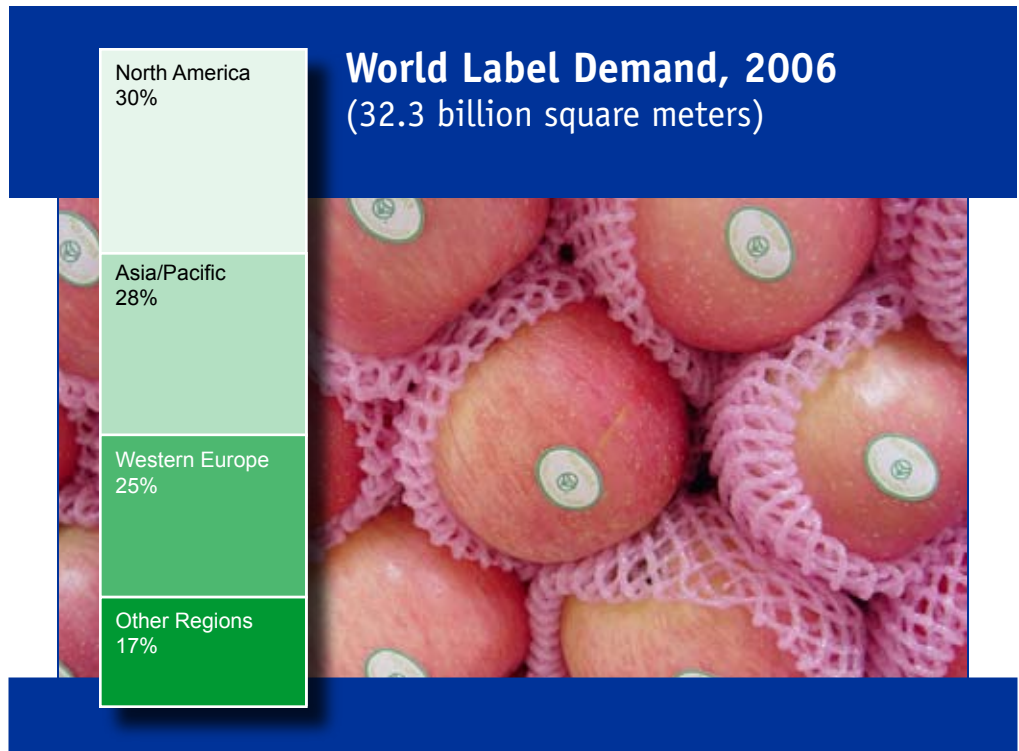

Gains in world label demand will be fueled by expansion of packaged consumer goods markets, the diffusion of advanced logistics and the penetration of high-tech, value-added labels.

Global market to grow 5.5% yearly through 2011

The global label market is forecast to advance at an annual pace of 5.5 percent to 42 billion square meters in 2011. Gains will be fueled by expansion of the world's packaged consumer goods markets -- specialty beverages, personal care products and medicinals offer especially good prospects. Also important will be the diffusion of advanced logistics and data processing systems throughout the developing world, and the development and penetration of technologically sophisticated, value-added labels that serve a range of functions. Examples include smart radio frequency and interactive packaging labels; authentication, tamper-evident and other security labels; and expanded content booklet labels.

Emerging economies to exhibit best gains

The best gains are expected in the world's emerging economies, which already account for over 40 percent of global label demand by area. Label markets in developing countries will enjoy robust growth, fueled by generally healthy economies, rising populations and expanding packaged consumer product sectors. China, which recently surpassed Japan as the world's second largest label market after the US, will continue to log double-digit demand growth. India and East European markets such as Poland and Russia also

offer especially favorable prospects. Traditional packaging uses are more mature in the developed economies of North America, Western Europe and (especially) Japan, where labels also face stiff competition from direct printing. Still, opportunities exist in such areas as inventory control and product security.

Pressure sensitive, plastic labels among top prospects

Pressure sensitive labels, which surpassed wet glues as the leading label type in the late 1990s, will account for 55 percent of the global market by 2011. However, gains have slowed in recent years as growth markets such as wine and electronic security have matured

and plastic sleeve, in-mold and wrap-around labels have cut into pressure sensitive strongholds such as beverage packaging.

In terms of materials, plastic labels will continue to penetrate traditional paper applications, capturing nearly 30 percent of the world market by 2011. Technological, financial, aesthetic, performance and environmental considerations will all favor the use of plastic over paper substrates. Paper labels, by contrast, will be adversely affected by changes in the packaging mix; paper labels are widely used in slow growing segments like metal and glass packaging, whereas plastic labels are favored in the robust plastic bottle market.

Sample Text, Table & Chart

ASIA/PACIFIC

Australia: Application Methods

Pressure sensitive labels accounted for 65 percent of Australian label demand in 2006, well above the regional average. Further increases are expected, with demand for self-adhesives slated to rise 6 percent annually through 2011. PSA labels are expected to capture a larger share of demand by the end of the next decade, as PSAs replace traditional wet-glue labels (especially wine packaging).

Gain in demand for synthetic and performance qualities of self-adhesive labels, as well as growth in variable information processing applications. While VIP pressure sensitive labels face stiff competition from lower-cost direct printing technologies, printing quality and performance tend to favor the use of labels, since the type of substrate is consistent and controllable.

Pressure sensitives will also benefit from strong demand for leaflet and other expanded content labels, especially in the Australian pharmaceutical sector. These labels are well suited to conflicting regulatory pressures to provide additional production information without adding to packaging waste.

The best gains are expected for newer labeling methods including in-mold labels (IMLs) and various types of sleeve and wrap-around labels. Over the past decade, for example, Unilever Australia replaced the PSA labels on many of its laundry and cleaning products with IMLs from local market leader Pemara Labels. Advanced applications include

COMPANY PROFILES

Renaissance Mark

350 Southwood Court
 Bowling Green, KY 42101
 270-745-0829
<http://www.renaissance-mark.com>

Annual Sales: \$100 million (verify, 5/07)
 Employment: 1,000 (5/07)

Key Products: roll-to-roll and in-mold labels

Renaissance Mark is a leading North American manufacturer of labels for the water, wine and spirits, food and beverage, and health and beauty aid industries. The privately held company is owned by Arsenal Capital Partners (New York, New York), a private equity firm.

The Company produces a wide range of standard, promotional and other types of labels made from paper, clear and opaque film, foil, and metallized and laminated substrates. Printing processes utilized in Renaissance Mark's labels include web, offset, flexographic, gravure and silkscreen methods. Among the finishing techniques utilized by the Company are die cutting, embossing, hot stamping and bronzing.

Standard labels include pressure sensitive, glue-applied and roll-to-roll types. Among the promotional labels made by Renaissance Mark are PEEL'N RESEAL labels, which are designed to increase surface area by up to three times that of regular labels, thereby eliminating the need for secondary packaging inserts. These two-piece labels feature three printable surfaces and a hinged retaining edge. PEEL'N RESEAL labels are available in paper-to-paper, paper-to-orientation polypropylene (OPP) and OPP-to-OPP constructions.

ORDER INFORMATION

Five Convenient Ways to Order

INDUSTRY MARKET RESEARCH FOR BUSINESS LEADERS, STRATEGISTS, DECISION MAKERS

Freedonia

ONLINE: www.freedoniagroup.com

MAIL: Print out and complete the order form and send to The Freedonia Group (see address at the bottom of this form)

PHONE: Call toll free, 800.927.5900 (US) or +1 440.684.9600

FAX: +1 440.646.0484 (US)

EMAIL: info@freedoniagroup.com

Free Handling & Shipping

There is NO charge for handling or UPS shipping in the US. Expect delivery in 3 to 5 business days. Outside the US, Freedonia provides free airmail service. Express delivery is available at cost.

Orders Outside of the US

Checks must be made payable in US funds, drawn against a US bank and mailed directly to The Freedonia Group. For wire transfers please contact our customer service department at info@freedoniagroup.com. Credit cards accepted.

Credit Card Orders

For convenience, Freedonia accepts American Express, MasterCard or Visa. Credit card purchases must include account number, expiration date and authorized signature.

Save 15%

If you order three (3) different titles at the same time, you can receive a 15% discount. If your order is accompanied by a check or wire transfer, you may take a 5% cash discount (discounts do not apply to Corporate Use Licenses).

Corporate Use License

Now every decision maker in your organization can act on the key intelligence found in all Freedonia studies. For an additional \$2300, companies receive unlimited use of an electronic version (PDF) of the study. Place it on your intranet, e-mail it to coworkers around the world, or print it as many times as you like,

OTHER STUDIES

Active & Intelligent Packaging

US demand for active and intelligent packaging will grow 13% yearly through 2011. Intelligent packaging will grow the fastest, driven by the emergence of lower cost time-temperature indicator (TTI) labels. Active packaging will be paced by gas scavengers. Pharmaceuticals, beverages and food will offer the best market prospects. This study analyzes the US active and intelligent packaging industry, with forecasts for 2011 and 2016 by product and market. It also details market share and profiles major players.
 #2236 08/2007..... \$4400

World Pharmaceutical Packaging

World pharmaceutical packaging demand will grow 5.9% annually through 2011. Western Europe, the US and Japan will continue to account for most demand while China, India and Brazil lead gains. Prefillable inhalers and syringes will grow the fastest while plastic bottles will remain dominant. This study analyzes the \$25.8 billion world drug packaging industry, with forecasts for 2011 and 2016 by material, product, world region and for 30 countries. It also details market share and profiles major players.
 #2213 07/2007..... \$5800

Beverage Containers in China

Demand for beverage containers in China will grow 8.9% per annum through 2010. Plastic will remain the dominant material in unit terms while paperboard will grow the fastest. Milk will stay the largest market and be one of the fastest growing, with fruit beverages posting the fastest gains. This study analyzes the ¥60.5 billion beverage container industry in China, with forecasts for 2010 and 2015 by market and material. The study also evaluates company market share and profiles leading industry participants.
 #2183 05/2007..... \$4900

World Pressure Sensitive Tapes

The global market for pressure sensitive adhesive (PSA) tapes will grow 4.7% yearly through 2010. Demand will benefit from a firming global economy and advantages over other joining, sealing and bonding methods. Corrugated carton sealing tapes will remain dominant while technical and specialty tapes grow the fastest. This study analyzes the \$20.5 billion world PSA tape industry to 2010 and 2015 by type, material, world region and for 23 countries. It also evaluates market share and profiles 42 players.
 #2169 03/2007..... \$5500

Paper Versus Plastic in Packaging

In eighteen selected markets where plastic and paper compete as packaging materials, plastic will increase its market share to 53% by 2010. The fastest gains for plastic will occur in soy and other nondairy beverages and pet food applications, followed by frozen food, fruit beverages, detergents and single-serving milk bottles. This study analyzes the 24 billion pound competitive plastic and paper packaging industry to 2010 and 2015 by product and market. It also details company market share and profiles major players.
 #2133 12/2006..... \$4400

About The Freedonia Group

The Freedonia Group, Inc., is a leading international industry market research company that provides its clients with information and analysis needed to make informed strategic decisions for their businesses. Studies help clients identify business opportunities, develop strategies, make investment decisions and evaluate opportunities and threats. Freedonia research is designed to deliver unbiased views and reliable outlooks to assist clients in making the right decisions. Freedonia capitalizes on the resources of its proprietary in-house research team of experienced economists, professional analysts, industry researchers and editorial groups. Freedonia covers a diverse group of industries throughout the United States, the emerging China market, and other world markets. Industries analyzed by Freedonia include:

- Chemicals • Plastics • Life Sciences • Packaging • Building Materials • Security & Electronics • Industrial Components & Equipment • Automotive & Transportation Equipment • Household Goods • Energy/Power Equipment

[Click here to learn more about Freedonia](#)

Freedonia Custom Research

Freedonia Custom Research delivers the same high quality, thorough and unbiased assessment of an industry or market as an industry study. Since the research initiative is based upon a company's specific needs, companies harness Freedonia's research capabilities and resources to answer unique questions. When you leverage the results of a Freedonia Custom Research engagement, you are able to obtain important answers to specific questions and issues associated with: mergers and acquisitions, new product launches/development, geographic expansion, entry into new markets, strategic business planning, and investment and funding decisions.

Freedonia Custom Research is ideal for companies seeking to make a strategic difference in the status quo and focus on future business growth. Working side by side with clients, Freedonia's team is able to define a research project that is custom-tailored to answer specific questions and provide the basis from which a company can make informed business decisions.
