

Lawn & Garden Robots

Industry Study #3695 | January 2019

This study examines the US lawn and garden robot market. It presents historical sales data (2012, 2017, 2018) and forecasts (2022, 2027) for two main product categories (robotic lawn mowers and other). Other lawn and garden robots includes those utilized for snow blowing, weeding, and other gardening tasks. The study also offers consumer survey data. In addition, the study analyzes industry participants with commercialized products and upstart players, such as FarmBot, Franklin Robotics, Honda Motor, Husqvarna, iRobot, Left Hand Robotics, LG Electronics, MTD Products, Positec Technology, STIHL, The Kobi Company, and Zucchetti Centro Sistemi.
