

# Global Flooring

Industry Study #3701 | January 2019

This study covers the global flooring industry. Demand by product and market, production, and trade are presented in square meters. Demand totals at the regional and global level are also provided in dollars. For each country, demand is offered by product for ceramic tile, wood, laminate, other nonresilient flooring (such as stone, glass, and seamless flooring), vinyl, other resilient flooring (such as linoleum, rubber, and cork flooring), tufted carpets and rugs, woven carpets and rugs, and other carpets and rugs such as needlepunched, knotted, and knitted types). Demand by market is given for residential building construction, (both new construction and improvement and repair); nonresidential building construction (both new construction and improvement and repair related demand) transportation equipment and nonbuilding structures.
