

# HOUSEHOLD PESTICIDES

Industry Study #3981 | December 2020

This Freedonia industry study analyzes the \$1.2 billion US household pesticide industry. It presents historical demand data and forecasts by product (insecticides, fungicides, and other pesticides) and application (insect control, insect repellents, animal repellents, rodent control, and other applications). Demand is provided in US dollar terms. Also provided are demand by formulation and sales by retail distribution channel.
