(billion 2005 dollars)26
6. US Construction Improvement & Repair
Expenditures (billion dollars,
deflators & billion 2005 dollars).....27
7. US Construction Stock
(billion 2005 dollars)28
8. US Housing (thousand units)29

Composites Overview

The contents of our United States Composite Forecasts consist of tables that set forth historical and forecast series for numerous economic indicators developed by the Freedonia Group's economics department. These are the same series used by our industry analysts in the preparation of our various industry studies. For each series, historical figures are presented for 2001, 2006 and 2011; forecasts are provided for 2016 and 2021.

Unlike Freedonia's typical industry study, composites contain no text, so there is no narrative that explains the analysis behind the forecasts. However, an informative title describes the contents of each table. For a complete listing of the specific items contained in a particular table, please contact our Client Services Department at 1.800.927.5900 (US) or 440.684.9600 (international).

The economic series presented in this study were made as of December 2012.

Freedonia Custom Research

Freedonia Custom Research delivers the same high quality, thorough and unbiased assessment of an industry or market as an industry study. Since the research initiative is based upon a company's specific needs, companies harness Freedonia's research capabilities and resources to answer unique questions. When you leverage the results of a Freedonia Custom Research engagement, you are able to obtain important answers to specific questions and issues associated with: mergers and acquisitions, new product launches/development, geographic expansion, entry into new markets, strategic business planning, and investment and funding decisions.

Freedonia Custom Research is ideal for companies seeking to make a strategic difference in the status quo and focus on future business growth. Working side by side with clients, Freedonia's team is able to define a research project that is custom-tailored to answer specific questions and provide the basis from which a company can make informed business decisions.
